after the second world war the drive for the modernisation of Britain's railways ushered in a new breed of locomotive the diesel diesel powered trains had been around for some time

but faced with a coal crisis and the clean air act in the 1950s it was seen as a part of the solution for british rail this beautifully illustrated book written by an expert on rail history charts the rise and decline of britain s diesel powered locomotives it covers a period of great change and experimentation where the iconic steam engines that had dominated for a century were replaced by a series of modern diesels including the ill fated westerns and the more successful deltics

a beautifully illustrated guide to the trains that took over as the age of steam was drawing to a close in the 1950s ideal for anyone interested in britain s railways and the evolution of rail transport

the type 3 diesel locomotive album comprises over 200 mainly unpublished full sized colour photographs of four classes of british engines developed in the earlier years of the modernisation plan the type 3 included four classes of locomotive of medium power output which undertook a wide range of duties from main line and local passenger services various freight duties and departmental work several are still in use on the national network and can be seen in various parts of the country the book has been compiled by david cable who has authored a range of very successful colour albums for pen and sword books ltd the photos illustrate the many duties and colour schemes of the classes in a variety of locations and colour schemes of the classes in a variety of locations using largely unpublished photographs from his extensive collection

a detailed illustrated history of uk locomotives exported across europe with over 200 previously unpublished photos many british main line diesel and electric locomotives have found further useful employment across europe after completion of their careers in the united kingdom this volume incorporates text and photos into a detailed history of these locomotives and their surprisingly extensive geographical use including in france the netherlands spain italy kosovo hungary romania bulgaria and croatia in recent decades a significant amount of exclusive factual information and over 200 previously unpublished photographs combine to provide a comprehensive insight into the british locomotives now finding a second life overseas including coverage of class 37 56 and 58 locomotives on high speed line construction work in france class 37 mishaps in spain class 86s on their day of arrival in bulgaria and various types of a c electric locomotives in their new habitats across eastern europe

this comprehensive history of these unique locomotives covers everything from performance issues to sightings detail differences and liveries the type 2 bo bo diesel electric classes 21 29 locomotives were constructed by the north british locomotive company in the early 1960s used in the scottish region of british railway they ran into numerous problems and were withdrawn from service within a decade due in part to their short careers these locomotives remain something of a mystery to train enthusiasts the scant information available on them is very often riddled with misinformation this authoritative volume corrects the record presenting the most comprehensive and accurate account of the nbl classes 21 29 fully illustrated with photographs and detailed line drawings this volume offers individual locomotive histories complete technical specifications accident and fire damage reports storage histories and a complete account of their disposal at both private companies and glasgow works

a current subject guide to articles in british technical journals

many of the first generation diesel locomotive designs are now as much a memory as the steam locomotives they were designed to replace and with the arrival of the class 66 and

class 67 many of the surviving first generation diesel classes will also be consigned to history this revised edition of british rail main line diesel locomotives is the result of many years research by colin marsden one of britain s best known and most highly respected modern traction authors illustrated by the superb scale drawings by graham fenn there have been a whole host of developments since 1987 when the first edition was published and the authors have included additional material covering not only the new classes 66 and 67 but have fully revised the entry for the class 60 and provided information on the latest class 47 revision the class 57 with its outline history of every locomotive selection of fine photographs and 4mm scale drawings this new edition of a popular classic will be an essential work of reference for railway modellers and modern traction enthusiasts well into the new millennium book jacket title summary field provided by blackwell north america inc all rights reserved

this is the first encyclopedia to chart the progress of britain s railway development it begins with primitive 17th century wagonways fully considers the eras of horse steam diesel and electric traction and then charts the change from private to public ownership finally it describes in detail the privatizations of the late 1990s over six hundred entries by eighty eight expert contributors provide a comprehensive and unique reference to all aspects of railways

the rapid dieselisation of britain s railways meant that many designs of locomotives were introduced from various manufacturers some were highly successful and generated a very enthusiastic following that continues today british diesel locomotives is a superb collection of black and white photographs supported by david hucknall s usual meticulously researched and well written captions that portray important locomotive classes from the deltics the warships and the westerns to the class 50s and 47s and even including the humble but essential multiple units this book will remind readers of a fascinating evolutionary period for britain s railways
